

FREE product samples

New England Biolabs

FREE product samples for your DNA amplification and Nucleic Acid Purification

NEB offers a wide range of high quality tools for DNA amplification and PCR. Test it yourself and take part in our free sample campaign.

Order a free sample from the list below and choose either OneTaq[®] DNA Polymerase for robust routine PCR or Q5[®] High-Fidelity DNA Polymerase for robust, ultra high-fidelity PCR.

For experiments that require detection and quantification rather than isolation, choose from NEB's Luna[®] RT and qPCR product line for high reaction efficiency and best-in-class performance.

When sustainability is a priority. Choose Monarch[®] kits for nucleic acid purification. Monarch use less plastic and are packaged in responsibly-sourced, recyclable material.

Only 2 samples per customer for as long as stock last.

Samples available:

- M0491G Q5 High-Fidelity DNA Polymerase
- M0486G OneTaq Quick-Load 2x MasterMix with Standard Buffer
- E1050G Exo-CIP Rapid PCR Cleanup Kit

- E3005G Luna Universal One-Step RT-qPCR Kit
- E3006G Luna Universal Probe One-Step RT-qPCR Kit
- M3003G Luna Universal qPCR Master Mix
- M3004G Luna Universal Probe qPCR Master Mix
- E3010G LunaScript RT Supermix Kit

- T5020G Monarch Microfuge Tube EcoRack
- T1010G Monarch Plasmid Miniprep Kit
- T1020G Monarch DNA Gel Extraction Kit
- T1030G Monarch PCR & DNA Cleanup Kit (5ug)
- T2010G Monarch Total RNA Miniprep Kit

Monarch[®] Nucleic Acid Purification Kits – Sustainable & recyclable product packaging

Monarch kits have paved the way and showed what a different path in nucleic acid purification could be – a path with more sustainable, eco-friendly products and practices. Learn more about how Monarch kits are designed for sustainability on NEB's website.
